PESIN, BORIS M

ART UNIT	PAPER NUMBER
----------	--------------

2174

DATE MAILED: 11/29/2005

Please find below and/or attached an Office communication concerning this application or proceeding.

Office Action Summary	Application No.		Applicant(s)	
	10/033,827		TOJO ET AL.	
	Examiner		Art Unit	
	Boris Pesin		2174	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 14 September 2005.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-31 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-31 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☒ The drawing(s) filed on 02/02/2005 is/are: a) ☒ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
 2. ☐ Certified copies of the priority documents have been received in Application No. _____.
 3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

Response to Amendment

This communication is responsive to the amendment filed 08/30/2005.

Claims 1-31 are pending in this application. Claims 1, 11, 16, 25, 30 and 31 are independent claims. In the amendment filed 08/30/2005, claims 1, 11, 16, 25, 30, and 31 was amended. This action is made Non-Final.

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3, 5-12, 14-17, 19-26, and 28-31 are rejected under 35 U.S.C. 102(b) as being anticipated by Yaegashi et al. (US 5956453).

In regards to claim 1, Yaegashi teaches an image processing apparatus comprising: a storage device that stores scene information including, at least, data for at least one representative frame extracted from, data for an interval of the scene and data for a hierarchical level of the scene of each of a plurality of scenes included in a moving picture to be played back (Figure 6B, Element 201); a display device that reads images of the representative frames of the plurality of scenes from the storage device

and concurrently displays the images chronologically based on an external designation of the hierarchical level (Abstract and Figure 6B, Element 201); a selection device that receives a selection of one of the concurrently displayed images of the representative frames on the basis of an external designation (Column 4, Lines 12-31); and a playback device that plays back the scenes corresponding to the images of the representative frames selected by the selection device (Column 4, Lines 12-31).

In regards to claim 2, Yaegashi teaches an image processing apparatus according to claim 1, wherein the display device chronologically displays a specified number of the images of the representative frames of the plurality of scenes concurrently (Figure 6B, Element 201).

In regards to claim 3, Yaegashi teaches an image processing apparatus according to claim 1, wherein the display device refers to the scene information in the storage device when a hierarchical level is externally designated (Figure 6B, Element 201), and chronologically displays images of the representative frames of the scenes having the hierarchical level designated and above (Figure 6B, Element 201).

In regards to claim 5, Yaegashi teaches an image processing apparatus according to claim 1, wherein the display device displays the images of the representative frames with data indicative of the hierarchical level corresponding to the representative frames being added to the images of the representative frames (Figure 6B).

In regards to claim 6, Yaegashi teaches an image processing apparatus according to claim 1, wherein the display device displays the scene played back by the

playback device together with the images of the representative frames of the scenes, and displays data for discriminating representative frames corresponding to the scene being currently played back from the other representative frames (Figure 1, Element 202).

In regards to claim 7, Yaegashi teaches an image processing apparatus according to claim 1, wherein the display device changes a display condition in the images of the representative frames of the scenes that are chronologically displayed based on an external instruction (Abstract).

In regards to claim 8, Yaegashi teaches an image processing apparatus according to claim 6, wherein the display device changes a display condition in the images of the representative frames of the scenes that are chronologically displayed, synchronizing with the images being played back by the playback device (Abstract, and Figure 1 Element 201).

In regards to claim 9, Yaegashi teaches an image processing apparatus according to claim 6, wherein the display device changes a display condition and selects whether change of the display condition is synchronized with the images being played back by the playback device, based on an external instruction (Abstract).

In regards to claim 10, Yaegashi teaches an image processing apparatus according to claim 1, wherein the playback device plays back one of the scenes corresponding to one of the images of the representative frames of the scenes, which is externally designated among the images of the representative frames of the scenes displayed by the display device (Abstract and Figure 6B).

In regards to claim 11, Yaegashi teaches an image processing apparatus comprising: a storage device that stores scene information including, at least, data for at least one representative frame extracted from a scene (Abstract) and data for a hierarchical level of the scene of each of a plurality of scenes included in a moving picture to be played back (Abstract); a display device that reads images of the representative frames of the plurality of scenes from the storage device and concurrently displays the images chronologically based on an external designation of the hierarchical level (Figure 6B, Element 201); and a selection device that receives a selection of one of the concurrently displayed representative frames one the basis of an external designation (Column 4, Lines 12-31).

Claim 12 is in the same context as claim 3; therefore it is rejected under similar rationale.

Claim 14 is in the same context as claim 5; therefore it is rejected under similar rationale.

Claim 15 is in the same context as claim 7; therefore it is rejected under similar rationale.

In regards to claim 16, Yaegashi teaches an image processing method comprising: storing scene information including, at least, data for at least one representative frame extracted from a scene, data for an interval of the scene and data for a hierarchical level of each of a plurality of scenes included in a moving picture to be played back (Abstract and Figure 6B, Element 201); receiving an external designation of a hierarchical level (Column 4, Lines 12-31 and Figure 6B); concurrently

Art Unit: 2174

displaying images of the representative frames of the scenes stored in the storing step, the concurrently-displayed images being displayed chronologically, based on an external designation of the hierarchical level (Figure 6B); receiving a selection of one of the concurrently-displayed images of the representative frames on the basis of an external designation (Column 4, Lines 12-31); and playing back the scenes corresponding to the images of the representative frames selected in the selecting step (Abstract, and Figure 1 Element 201).

In regards to claim 17, Yaegashi teaches an image processing apparatus according to claim 16, wherein the display step chronologically displays a specified number of the images of the representative frames of the plurality of scenes concurrently (Abstract and Figure 6B, Element 201).

Claim 19 is in the same context as claim 5; therefore it is rejected under similar rationale.

Claim 20 is in the same context as claim 6; therefore it is rejected under similar rationale.

Claim 21 is in the same context as claim 7; therefore it is rejected under similar rationale.

Claim 22 is in the same context as claim 8; therefore it is rejected under similar rationale.

Claim 23 is in the same context as claim 9; therefore it is rejected under similar rationale.

Claim 24 is in the same context as claim 10; therefore it is rejected under similar rationale.

Claim 25 is in the same context as claim 11; therefore it is rejected under similar rationale.

Claim 26 is in the same context as claim 12; therefore it is rejected under similar rationale.

Claim 28 is in the same context as claim 14; therefore it is rejected under similar rationale.

Claim 29 is in the same context as claim 15; therefore it is rejected under similar rationale.

Claim 30 is in the same context as claim 1; therefore it is rejected under similar rationale.

Claim 31 is in the same context as claim 11; therefore it is rejected under similar rationale.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person

Art Unit: 2174

having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Claims 4, 13, 18, and 27 are rejected under 35 U.S.C. 103(a) as being unpatentable over Yaegashi et al. (US 5956453) in view of Acharya et al. (US 6348929).

In regards to claim 4, Yaegashi teaches all the limitations of claim 1. Yaegashi does not teach an image processing apparatus wherein the images of the representative frames included reduced images. Acharya teaches, "Essentially, captured images are compressed by an image compression circuit 732 so that they can be efficiently stored in an image memory unit 734, which may be a ROM, RAM or other storage device such as a fixed disk." Column 13, Line 36). It would have been obvious to one of ordinary skill in the art at the time of the invention to modify Yaegashi with the teachings of Acharya and include a method to compress the images with the motivation to provide the user with more space on the memory.

Claim 13 is in the same context as claim 4; therefore it is rejected under similar rationale.

Claim 18 is in the same context as claim 4; therefore it is rejected under similar rationale.

Claim 27 is in the same context as claim 4; therefore it is rejected under similar rationale.

Response to Arguments

Applicant's arguments with respect to claims 1-31 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Boris Pesin whose telephone number is (571) 272-4070. The examiner can normally be reached on Monday-Friday except every other Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Kristine Kincaid can be reached on (571) 272-4063. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
